## **Sustainability Training**

LEO

#### We provide comprehensive sustainability training.

Leonardo Academy has been providing comprehensive training on a wide range of sustainability topics since 2002. We are the Sustainability Experts®, with over 30 years of experience in sustainability issues.

We have developed many standard training courses (see a detailed list of training courses on the back of this page) and provide customized programs to meet the objectives and interests of your specific audience.

Training courses can be presented in person or by webinar, and are also available on demand.

Many of our training courses are approved for continuing education credit by the U.S. Green Building Council (USGBC) and AIA Continuing Education System (AIA/CES). We are a USGBC-approved portfolio education provider.

#### **Our Corporate Training Program**

Leonardo Academy provides customized training to meet the needs of your organization. We offer a wide variety of customized training for companies and organizations including:

LEED Rating System Training and Exam Preparation

- LEED Green Associate 2009
- LEED-EB: O+M 2009

Sustainability Knowledge Training / Credentialing Maintenance

A wide variety of shorter courses can be arranged into full-day sessions or multipleday series. These courses can be used for credentialing maintenance.

Our instructors will come to your location, on your schedule, and teach your employees exactly what they need to know. We travel so you don't have to. If your employees are spread out geographically or if it is not economical for your company to have everyone out of the office at once, Leonardo Academy can provide customized training via webinar. Individuals can attend from the comfort of their desks or the webinar can be broadcast to groups in conference rooms to provide more interactivity.

### **Training Topics Include:**

- Organizational Sustainability
- LEED® for Sustainable Buildings
- Emissions Inventories and Offsets
- Greening the Supply Chain
- Greening Waste Management
- Sustainable Land Management
- Annual Sustainability Reports

See the back of this page for a complete list of training courses.
